

eyeXpress™

Eye Hydration System

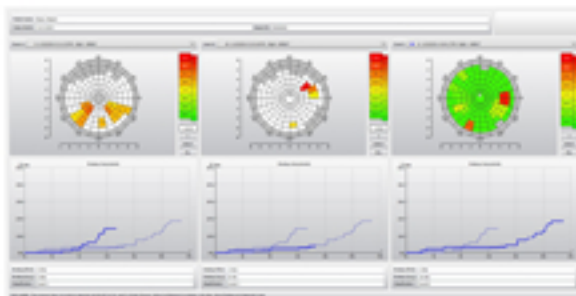

FDA Class 1 Exempt Device

The eyeXpress™ Eye Hydration System is a hands free device developed for in-office therapy to relieve symptoms of dry eye while assisting eye hydration. Our unique goggle system applies continuous heat to the upper and lower eyelid at the same time. The eyeXpress™ treats both eyes simultaneously saving time for both the patient and technician.

Key Points

- Noninvasive
- Technician Friendly
- Hands Free
- Portable and Compact
- Patient Friendly
- Comfortable

During this exam, the patient experienced significant relief after one treatment using the eyeXpress™. The average tear film breakup went from 9 seconds to 16 seconds.
